

MICHELLE PTACEK

Presenter

About

Michelle uses foundational principles in cognitive diversity to help people gain awareness about themselves and their teams. She works enthusiastically to bring useful ideas from the world of gifted education to the broader public. Likewise, she strives to connect the psychological science of expertise and concepts from organizational psychology to the practice of gifted education.

- Cognitive Diversity
- High Sensitivity
- Social/Emotional Learning
- Personality Development
- Introversion/Extroversion
- Visual Thinking
- Perfectionism
- Creative Thinking

Improved performance. Improved decision making.
Greater adaptability. Enhanced creativity.

WHAT IS COGNITIVE DIVERSITY?

Cognitive diversity is an area of psychological research addressing the different ways people think, process information, and make decisions. An environment that appreciates a variety of unique perspectives is more likely to solve complex problems, spot new opportunities, and be innovative. A person who understands their own unique strengths and areas of need is more likely to develop a healthy self-concept.

CHOOSE YOUR OWN ADVENTURE

Michelle loves working with diverse groups and tailoring her presentations to meet their specific needs.
